

June 2013

Dear Omicron Engineering, Inc. Customer,

Omicron is committed to integrity in all business dealings, including responsible sourcing of materials throughout our global supply chain. On August 22, 2012, the Securities and Exchange Commission (“SEC”) adopted final rules implementing the Conflict Minerals disclosure provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“the Act”). Under the Act, companies must perform due diligence and report on their products containing conflict minerals from the Democratic Republic of Congo (“DRC”) or certain adjoining countries.

Therefore, in Omicron's effort to comply with this new law, we have determined that none of Omicron's current raw material covered by the Act, like coltan, niobium, tantalum, tin, gold or tungsten, come from conflict regions or should be considered conflict materials. Fully understanding the importance of this issue, we will make every effort to ensure that all future material are also “DRC Conflict Free”.
